Work Experience

Frontend Developer — Erasmus Program, Córdoba, Spain

May 2 – May 16, 2025

- Built a company website in a three-person team during a two-week programming project.
- Developed site features using HTML, PHP, Python, and database integration.
- Worked 5–7 hours per day and completed the project on schedule.
- Although none of the team had prior PHP experience, we learned PHP together within two days and began implementing features immediately.

Web Project Contributor — Team-based Learning

2024 – 2025

- Collaborated closely with teammates to design and implement front-end pages.
- Practiced problem-solving in a small agile team and improved development workflows.

Skills

- HTML, CSS, JavaScript, C++, Python, Java
- Strong understanding of AI, its functions, and practical usability
- Ability to understand requirements and deliver requested solutions in optimal form
- Responsive design, accessibility (a11y), React, Git

Certifications

- Diploma — qualified to work as a Web Page Developer
- Microsoft Word & Excel Certifications
- AI Development certificates — completed online workshops and attended meetings

Awards & Activities

- Award — Recognized during the Erasmus project in Córdoba for delivering a qualified website and demonstrating strong programming and project delivery skills.
